Professional Experience

Freelance Full-Stack Developer

Sept 2021 - Present

- Developed back-end and front-end solutions for app replicas (e.g., Twitter, Tinder).
- Utilized JavaScript technologies for seamless integration and functionality.
- Implemented Jest to ensure robust and reliable code.
- Ensured responsive design and scalability across devices.

Haply Robotics - Full-Stack Developer

June 2022 - Feb 2024

- Built Haply Robotics' interactive web platform from scratch.
- Designed and implemented pages showcasing products, use cases, and a developer hub.
- Developed a fully localized and responsive experience for both desktop and mobile.
- Created a user-friendly, intuitive design for improved accessibility.
- Used GatsbyJS, NodeJS, and Contentful CMS for content management.
- Maintained clear, comprehensive documentation for development processes and team collaboration.
